The Haunted Network: Start Here

AP CYBERSECURITY UNIT 1 REVIEW · 2 CLASS PERIODS · 47 CHALLENGES · HALLOWEEN

Students explore a six-room haunted house where every ghost is a real Unit 1 attack: phishing, password attacks, evil twin Wi-Fi, AI voice cloning and AI defense. They finish by downloading a PDF report and submitting it on Canvas. Topics 1.1-1.5 are all covered, each tied to its CED scenario (1A-1E).

What is in this kit

File	What it is for
The-Haunted-Network-Game.html	The game. One self-contained file: intro video, all questions and the PDF report builder are inside. Give this to students.
Teacher-Facilitation-Guide.pdf	50-minute plans for both days, debrief questions, full answer key, written-response rubrics with exemplars, troubleshooting.
Haunted-Network-Intro-Video.mp4	The 1 min 40 s spooky intro with captions. Also built into the game; this copy is for projecting or posting.
00-START-HERE.pdf	This page.

Set up in 15 minutes

1. Open **The-Haunted-Network-Game.html** in Chrome or Edge on your own computer. Watch the intro and play a few questions in the first room.
2. Go to **Results & PDF** and click **Download PDF report** to see what students will submit. To clear your test run, reload the page, choose **I'm a different student**, then **Erase and start over**.
3. Upload the HTML file to Canvas (Files or a Module item). Students **download it and open the saved file** in Chrome or Edge. No account, install, or login is needed.
4. Create a Canvas assignment that accepts a PDF upload, worth 434 points (410 auto-scored + 24 for six written responses at 4 points each), or your own scale.
5. Before Day 1, have one student open the file on a school device and test the PDF download.
6. **End of Day 1:** every student clicks **Download save file** or **Copy resume code** on the House map and keeps it in their email or Drive. That is the fail-safe for Day 2.

Run it

Day 1 (Night 1): play the intro video for the class, students sign the guest book with full name and period, then play Rooms 1-3 (Topics 1.1-1.3). **Day 2 (Night 2):** same device and browser, Rooms 4-6 (Topics 1.4, 1.5 and the mixed Midnight Gauntlet), then download the PDF and submit on Canvas. Detailed timings are in the guide.

Need to know

- **Progress saves in the student's browser.** Same device and browser is easiest. On a different computer, students click **Started on another computer?** and load their save file or paste their resume code. Edited saves are rejected, answers are re-scored, and the PDF notes the move.
- **One answer per challenge.** Answers lock after submitting. Partial reports only reveal correct answers for questions already answered.
- **If a PDF does not appear,** check the Downloads folder (HauntedNetwork_First_Last_P#.pdf). Backup: the **Copy report text** button, pasted into a Canvas text entry.
- **Works offline** once the file is downloaded, on Chromebooks, Windows and Mac. Headings use a web font when online and a standard font otherwise.
- **Shared devices:** one student per browser. Have the first student download their PDF before the next one starts over.

Questions about pacing, scoring or the answer key: see Teacher-Facilitation-Guide.pdf.
